ATTACHMENT 2 – LABOR CATEGORY DESCRIPTIONS

PROGRAM MANAGER

Minimum/General Experience: Has ten (10) years general experience and experience in information technology, military, or civilian Government programs. Three (3) years of this experience is in the direction or management of Government programs with ten or more individuals or seven years of experience in supporting the technical or business operational aspects of multiple, large scale Government programs with ten or more individuals. Has knowledge and experience in systems requirements definition, work planning, budget development, fiscal control, scheduling, task control, work progress assessments, contract management, subcontract/vendor management, client communications, staff recruiting/development or personnel communications.

Functional Responsibility: Plans, directs, and coordinates the activities of program management and administration. Supervises personnel to complete tasks relating to complex integrated systems design, development or modification as required by specific contracts.

Minimum Education: Masters degree

IT ANALYST IV

Minimum/General Experience: Has sixteen (16) years general experience with four (4) years in IT projects.

Functional Responsibility: Supervises or performs under large IT service contracts; supervision includes people of various job categories and skills. Provides technical and administrative direction for tasks, including review of work products for correctness, compliance with industry accepted standards and user standards specified in specific TOs. Provides support to clients relating to information technology arenas, financial administration, logistics as well as program analysis.

Minimum Education: Bachelors degree

IT ANALYST III

Minimum/General Experience: Has ten (10) years general experience and demonstrated experience with three (3) years in IT projects.

Functional Responsibility: Supervises or performs under IT service contracts; supervision includes people of various job categories and skills. Supports senior level individuals in the technical and administrative direction for tasks, including preparing and reviewing work products for correctness, compliance with industry accepted standards and user standards specified in specific TOs. Provides support to clients relating to information technology arenas, financial administration, logistics as well as program analysis.

Minimum Education: Bachelors degree

IT ANALYST II

Minimum/General Experience: Has five (5) years general experience and demonstrated experience with one (1) year in IT projects.

Functional Responsibility: Provides technical and administrative support to IT service contracts, working with people of various job categories and skills. Provides technical and administrative support for tasks, including developing work products that are complete in terms of correctness, compliance with industry

accepted standards and user standards specified in specific task orders. Provides support to clients relating to information technology arenas, financial administration, logistics as well as program analysis.

Minimum Education: Bachelors degree

IT ANALYST I

Minimum/General Experience: Has four (4) years general experience and demonstrated experience with less than one (1) year in IT projects.

Functional Responsibility: Provides technical and administrative support to IT service contracts, working with people of various job categories and skills. Provides technical and administrative support for tasks, including developing work products that are complete in terms of correctness, compliance with industry accepted standards and user standards specified in specific task orders. Provides support to clients relating to information technology arenas, financial administration, logistics as well as program analysis.

Minimum Education: High School Diploma

TECHNICAL EXPERT

Minimum/General Experience: Has eight (8) years general experience and demonstrated experience in information and information security systems, including specialized experience providing state of the art solutions in IT technology (or, if the particular area of expertise is new state of the art technology, the specialized experience may be less than four years and more consistent with the age of the technology).

Functional Responsibility: Provides expert, independent services and leadership in specialized areas. Provides expertise on an as needed basis to all task assignments. Provide expert advice and assistance in state of the art hardware and software. Coordinates with contractor management and client personnel to ensure that the problem has been properly defined and that the solution will satisfy the client requirement.

Minimum Education: Bachelors Degree or program related certification(s)

SENIOR INFORMATION SCIENTIST

Minimum/General Experience: Has fifteen (15) years general experience and demonstrated experience solving design information systems engineering problems for modern integrated systems.

Functional Responsibility: Performs in the area of software development; visual display systems and technologies; mathematical modeling; system and software design, communications and networking; computer-generated imagery; digital/analog systems; human factors/ergonomics; and electronic sensor technologies. Independently researches solutions to complex simulation and/or computational problems, and determines optimal solutions. Develops technical reports, directs and supervises the technical work of junior staff members, as required. Makes formal technical presentations as required.

Minimum Education: Bachelors degree

TECHNICIAN III

Minimum/General Experience: Has fifteen (15) years of general experience and experience in information technology projects.

Functional Responsibility: Responsible for direct technical work on projects. Performs a variety of analyses relating to acquisition, procurement, financial management, and logistics as well as prepares

documentation. Prepares and makes briefings and presentations. Assists on-site clients in support of installations. Works independently and acquires, ships, installs, operates, maintains, configures, troubleshoots, reviews, provides logistic support for or repairs IT systems devices, circuits, cables, components, software, and end-user devices, components, software and connectivity. Where required, the candidate assists in the development and management of project plans. Reviews task performance and work products for correctness, for adherence to design concepts and user requirements, and for progress in accordance with schedules. Where required, coordinates with the Contractor's project manager, COR, and Government user representatives to ensure accurate solutions and user satisfaction on technical matters.

Minimum Education: High School Diploma

TECHNICIAN II

Minimum/General Experience: Has six (6) years of general experience and experience in information technology projects.

Functional Responsibility: Responsible for direct technical work on projects. Performs a variety of analyses relating to acquisition, procurement, financial management, project control and logistics and may prepare technical documentation. Prepares and makes briefings and presentations. Assists client in support of installations. Works independently and acquires, ships, installs, operates, maintains, configures, troubleshoots, reviews, provides logistic support for or repairs IT systems devices, circuits, cables, components, software, and/or end-user devices, components, software and connectivity. Where required, the candidate assists in the development and management of project plans. Reviews task performance and work products for correctness, for adherence to design concepts and user requirements, and for progress in accordance with schedules. Where required, coordinates with the Contractor's project manager, COR, and Government user representatives to ensure accurate solutions and user satisfaction on technical matters.

Minimum Education: High School Diploma

TECHNICIAN I

Minimum/General Experience: Has one (1) year of general experience.

Functional Responsibility: Performs direct technical and program work on projects. Works under general supervision and installs, operates, maintains, configures, troubleshoots, or repairs IT systems devices, circuits, cables, components, software, and end-user devices, components, software and connectivity or supports program analysis. When required, coordinates with the Contractor's project manager, COR, and Government user representatives to ensure accurate solutions and user satisfaction on technical matters.
